

CIOB Fire Safety & Building Safety Qualifications

Creating the experts of the future

We are the Chartered Institute of Building, and we stand for the science, ethics, and practice of built environments across the world.

Everything we do is to improve the quality of life for those using and creating the built environment. We have a role in the management, leadership, education, and development of our industry, guiding and supporting our members during their careers.

The achievement of professionalism at all levels within our industry is at the core of our work. We are proud to have developed a framework of vocational qualifications that are a mark of the highest level of competence and professionalism, and a great way to progress to senior management roles in construction and onto professional CIOB Membership.

Our **Fire Safety and Building Safety** qualifications have been designed in collaboration with industry professionals,  contractors in meeting the requirements of new building safety legislation for higher risk buildings.

Fire Safety

Level 6 CIOB Certificate in Fire Safety for Construction

CIOB's Certificate in Fire Safety for Construction is designed for a range of construction related occupations, including dutyholder roles such as Building Safety Managers and Project Managers working on higher risk buildings.

The course is made up of two units, designed to improve fire safety awareness for construction industry managers and those responsible for managing fire safety in the workplace. You will learn how to effectively manage and implement fire safety systems, the safety of building occupants and fire safety laws to reduce the occurrence of fires.

ciob.me/fire-safety-certificate

Learning outcomes:

- Evaluate the role of Building Safety Manager
- Assess the role and responsibilities of the local authority fire service
- Describe the principles of building design and construction
- Evaluate the aims of the fire risk assessment process
- Assess the principles of fire behaviour

Building Safety

CIOB Level 6 Diploma in Building Safety Management

Our Building Safety Management Diploma is designed for construction professionals who are moving into this important, building safety dutyholder role.

It's ideal for professionals who require the knowledge and skills to manage the wider holistic, whole building obligations for occupiers' safety and health. The six units of learning cover areas such as fire and structural safety, as well as how to establish a clear point of contact with residents, building trust and collaboration to keep buildings safe.

ciob.me/building-safety-diploma

Learning outcomes:

- Apply the principles of building design and construction for fire safety
 - Engage residents, communities, and users of buildings with professionalism
 - Understand the principles of fire behaviour to high-risk buildings
 - Manage resources in building safety management
